Subject: Re: Draft of Order Regarding Excess CO2 emissions by Bloom in DE 2020

Mr. Regan

When you investigate the Environmental Injustice in Delaware and the Bloom Bloomdoggie, question one Bryan Horsey. This sleazebag was on Senators Biden. Kaufman and Coon's staff before joining Bloom to be in charge of their DE government affairs. He is the one who lied to DE DNREC that Bloom had no coke in their fuel cells. He left Bloom after doing this lying.

Let me tell you we will watch you like a hawk to see if you really are for ENVIRONMENTAL JUSTICE or you just another bull sh**tter.

You could become a hero of the left, right, and center if you restore real environmental justice for all. This includes US taxpayers and US ratepayers that have subsidized the gangrene Bloomdoggie to the tune of \$2 billion.

Bloom (Gore, Doerr, Powell etc.) lied in October 2018 to DE DNREC that their new Fuel Cells that replaced their old Fuel Cells emit only 700 pounds of CO2 per mwh. They claimed their old fuel cells emitted 773 pounds of CO2 per mwh. **The new fuel cells are emitting more than 773 pounds of CO2 per mwh.** We have the data from public filings with DE PSC. Therefore the new fuel cells by Bloom's own admission are worse than their old crap. Bloom and their tax equity partners Southern Power and Assured Guaranty used the fake permits Garvin gave them to scam \$75 million of investment tax credit from the IRS in 2019.

The permit applications were under penalty of perjury and they must be criminally prosecuted.

They also claimed they only emit 0.016 pounds of VOCs per mwh. I do not believe this number and EPA must test air emissions for all the Bloom Boxes in the country. For 18 months Bloom admitted to DE PSC that they have to decoke their units 3 to 4% of the time. Bloom then lied to DE DNREC that there is "no coke" in their fuel cells.

Mr. Regan your JOB #1 at EPA will be to fully prosecute Bloom, its officers and directors and its major shareholders who are all crooks. Don't worry that Louis XX John Doerr owns Joe Biden, Schumer and 99% of Senate Democrats.. Don't worry that Joe Biden is part of the Bloomdoggie in Delaware. You must just focus on ENVIRONMENTAL JUSTICE.

Senator Cotton

The Bloom BLOOMDOGGLE has to be brought up in the confirmation hearings for the head of the EPA and the SEC of Energy.

Geoff and Adam, at NBC, start reporting real stuff on Bloom. Don't be a liar like Anne Thompson.

Mr. Winslow

Bloom and Delmarva submitted their latest filing with DE PSC.

Bloom has not curtailed generation and will certainly exceed the permitted quantities of CO2 per year under the DE DNREC permits. We will finalize the cales when the January 2021 docket is filed. It looks like the excess amount of CO2 will be about 3,200 extra short tons per year. See the table below based on the first 11 months of 2020. We The People expect the DE PSC to protect ratepayers and claw back the \$1.36 million stolen by Bloom (Al Gore, John Doerr, Colin Powell and other sleazebags)

Mr. Regan

When you head the EPA we expect the EPA to investigate how Shawn Garvin and the scum at DE DNREC colluded with Bloom to claim that their shale natural gas emits 3.5% less pounds of CO2 per million BTUS than the EPA states it really does. This sleight of hand is FRAUD.

Mr. Winslow

In late January I will finalize this draft order we expect the DE PSC to issue to claw back money from Bloom Energy for the unpermitted CO2 at Red Lion and Brookside DE. The unpermitted CO2 is a result of unpermitted megawatt hours as Bloom lied to DNREC that Bloom's natural gas emits less CO2 than the EPA and the rest of the world knows natural gas really emits.

I have warned Bloom repeatedly that they are emitting more CO2 per hour than permitted at both Red Lion and Brookside.

Bloom only cares about MONEY not the environment.

The dollar amount is directly proportional to the amount Bloom took from ratepayer in relation to the excess CO2 and the permitted CO2. I will finalize this amount in late January when the actual operations for Bloom's dirty boxes in December 2020 are known.

I expect the DE PSC to protect ratepayers and the environment.

I expect a reply from you in five working days that the DE PSC will not shirk its duties because of political pressure.

To FERC and EPA

PJM bought unpermitted excess dirty electrons from Bloom. This must be fully investigated by the FEDs.
